# ABOUT US

## **EPINION IS A MARKET RESEARCH AGENCY.**

We deliver fact-based insights to our clients, supporting significant decisions.

## **WE ARE BOLD RESEARCHERS.**

We push boundaries and conventional thinking to deliver better results, smarter.

## **TECHNOLOGY IS ESSENTIAL TO THIS.**

In fact the name EPINION comes from combining the words Electronic and Opinion.

## **GLOBAL PANELS**

With our global panels, we offer our clients to reach opinions from all over the world. Our unique by-invitation-only panels guarantee the best quality the industry can offer. Every day more than 2,000 people join our panels – and they do it for the right reasons. We have centralized our responsive global operations and sales team to secure fast turnaround and one point of contact for international projects.

## **LOCAL INSIGHTS**

Our seven offices in Europe and Asia provide leading research consultancy and local insights. We believe in a customized approach to client problems. One-size-fits-all might work for T-shirts, but not for professional clients. Our first step is always to understand your unique situation and local environment, and then apply our best people to design a solution that fits.

Epinion sees diversity as a resource and appreciates that each employee contributes with their particular background, personality and abilities. We welcome all qualified applicants regardless of religion, sexual orientation, ethnicity and/or handicaps. Our final decision is 100% based on merits.

# MAIN ROLES & RESPONSIBILITIES

- Participate in data processing and programming
- Setup and collect data for market research projects
- Process , manage and verify data using SPSS, MS Excel, C#, Notepad++ and MS SQL Script
- Perform data processing functions on ad hoc projects
- Provide task breakdown, task estimation and resource mentoring
- Define and improve quality check process
- Daily communication with colleagues aboard (Denmark, Norway, Sweden... ) to define solutions
