INTERN, DATA SCIENCE

Interns play an integral role at Fossil Vietnam - you're the innovators-to-be, the big idea-creators, and the passionate newcomers who inspire us to make great products. We offer a diverse array of internship possibilities within various functions across the organization. Our programs are open to a limited group of students, as to provide personalized mentorship opportunities and an intimate, up-close perspective on how we work.
We're excited to teach you what we know and be inspired by your insights!

WHAT YOU'LL BE RESPONSIBLE FOR:
- Data Platform:
    - Build up a data pipeline and enterprise data warehouse on cloud (AWS)
- Data analytic:
    - Understand user's behaviors
    - Analyse device's performance
- Notification service:
    - Provide recommendations to users through mobile app
    - Predict errors which may occur and bring it to developers' attention

WHAT WE NEED:
- Must have:
    - Good at programming (any language)
    - Good at designing and querying on RDBMS
    - Good logical thinking
    - Have an enthusiasm and positive attitude at work
    - Proven passion for working with numbers or data sets
    - GPA >= 7.0
- Nice to have
    - Understanding or have experience in ETL, ELT or data warehouse
    - Understanding or have experience in big data
    - Understanding or have experience in machine learning or AI
    - Have experience in cloud services (AWS, GCP, Azure, ...)
    - Have experiences in developing APIs
    - Analytical and descriptive statistics skill
