

Job band: 10	Department Development
	Reports to: Senior FE Engineer

JOB OVERVIEW

We are looking for a passionate Back-End Developer Intern to join our engineering team. In this role, you will work on server-side logic, database management, and API development, gaining hands-on experience with modern back-end technologies. This internship is a great opportunity to learn from experienced engineers while contributing to scalable and efficient systems.

DUTIES AND RESPONSIBILITIES

- Assist in the design and development of web pages and user interfaces.
- Collaborate with team members on various projects and tasks.
- Help ensure that applications are responsive and accessible.
- Participate in code reviews and contribute ideas for improvement.
- Learn and utilize web development tools and best practices.

QUALIFICATIONS AND REQUIREMENTS

Qualifications:

- Develop and maintain server-side applications using programming languages such as Node.js/NestJs.
- Design and optimize database schemas (SQL: MySQL, PostgreSQL).
- Build and integrate RESTful APIs for front-end consumption.
- Assist in debugging, performance tuning, and security enhancements.
- Collaborate with front-end developers to ensure seamless data flow and functionality.
- Participate in code reviews and adopt best practices in software development.

Requirements:

- Basic understanding of back-end programming languages (Python, Node.js, etc.).
- Familiarity with database systems (SQL or NoSQL).
- Knowledge of API development (REST, GraphQL) is a plus.
- Exposure to cloud platforms (AWS, GCP, Azure) or DevOps tools (Docker, CI/CD) is a bonus.
- Strong problem-solving skills and willingness to learn new technologies.
- Ability to read and understand technical documentation in English.
